Our care

Situated on the ground floor the Chestnut Suite provides residential accommodation for younger people with mental health needs. Our care is based on the recovery model which encourages and supports residents to live independent lives. This is achieved by helping them to build on their existing capabilities and to learn new skills. Residents are also encouraged to make their own decisions but are sensitively supported as required.

The Home is part of the local community and therefore offers real life experiences to its residents. We also encourage and support individuals to access education and work opportunities in the town.
